- Sophisticated hierarchical and drill down reports
- Comprehensive tool for sales planning and forecasting

Technology

The application is deployed on IIS 7.0 web server with SQL Server 2005. Application is developed on ASP.NET with SQL 2008 database and third-party components from

Company

Nespresso is the brand of Nestle, the Swiss confectionery and coffee company well known for its various brands of coffee. The Nespresso team is responsible for the sale of coffee capsules and coffee machines produced by Nestle.

Application

NORA is the acronym for Nespresso Operations Reporting and Analysis system. This is a reporting tool use by the Middle East regional office to consolidate sales and stock in the countries controlled by the region.

The web based application is used by Nespresso to capture monthly sales of coffee capsules and coffee making machines across different countries. The application is used for consumer as well as corporate sales and is integrated with multiple data sources from Nestle's enterprise system.

Agents across different countries plan inventory, confirm stock delivery and update sales figures in the NORA. The regional team reviews and updates plans for agents, and periodically update the Sell In figures from multiple sources, and create monthly reports for sharing with their head office.
